

AIR&WATER TEMPERING SPECIFICATIONS

Specifications	
Water ⁽¹⁾	Clean tap water with additives
Temperature (°C)	22 - 28
Pressure (bar)	2-3
Flow rate	Pressure loss
2 l / min	0.3 (bar)
4 l / min	0.4 (bar)
6 l / min	0.7 (bar)

(1) **Caution:** When using cooling water including deionised water, suitable additives must be used to prevent the growth of algae and protect the aluminium parts against corrosion.

Additive recommendations: Standard industrial applications: e. g. CCL105 (NALCO).

Food & beverage, packaging applications: e. g. polypropylene glycol (Dow Chemical). Please consult your additive supplier for dosage information.

AIR FLUSHING SPECIFICATIONS

Specifications	
Air	Clean air free of water & oil
Flow rate	Air Pressure
50 l / min	0.2 - 0.5 bar
